

Understanding Data and Their Environment

Homework – Creating the Datasets

Dr Nuno Pinto

Design and Deploy a Survey [1]

Each group will play a role of a governmental agency collecting data through an online survey. The group has to design a survey on a specific topic that will include a bloc of demographic information and 3 substantive questions about the topic.

The survey must be deployed on 23 March 4.00pm.

The links for the surveys will be sent to nuno.pinto@manchester.ac.uk who will then send to all UDaTE students

Students' responses must be done by 25 March 4.00pm.

All students (not the group!) will fill in all the 4 surveys not as themselves but using a persona, the same for all surveys.

The goal is to have 16 answers in all surveys (equal to the total of enrolled students).

Design and Deploy a Survey [2]

You will use UoM survey tool, SelectSurvey, available at <https://apps.mhs.manchester.ac.uk/surveys/Default.aspx>. Login required.

See the presentation with an introduction to SelectSurvey.

You will design a simple questionnaire with the relevant questions. The system is intuitive and has relevant support. By using the UoM SelectSurvey tool, compliance with data regulations and data protection is guaranteed.

Name your survey “UDatE_Group Topic”.

Design and Deploy a Survey [3]

Groups

Leeds: Driving licence

Liverpool: Land Registry

Manchester: Water utilities services

Sheffield: Join the local authority sports programme

Design and Deploy a Survey [3]

To summarise

1. Each group creates its survey
2. Deploy it by Monday 23 March 4.00pm
3. All students complete the 4 surveys by Wednesday 25 March 4.00PM
4. Each group will upload the file with the responses to

<https://www.dropbox.com/request/S8jgxwmF1toJYbeFEko6>
